PROFESSIONAL SUMMARY

Passionate CSE student with interests in software development, data analytics, artificial intelligence, and modern web applications. Skilled at transforming raw data into actionable insights and building scalable, user-centric solutions through clean architecture and efficient system design. Enthusiastic about learning emerging technologies, solving real-world engineering challenges, and building impactful products across diverse technology domains.

EDUCATION

Kalpataru Institute of Technology | Tiptur

Sept 2023 - Present

B.E. in Computer Science and Engineering

CGPA: 8.76 (current)

TECHNICAL SKILLS

Languages: CSS, HTML, Python, Java, JavaScript, TypeScript, SQL, C

Frameworks & Technologies: React.js, Next.js, Node.js, Express.js, FastAPI, Selenium, JUnit, REST APIs, TensorFlow, PyTorch, Scikit-learn, LangChain

Databases & Data: MySQL, PostgreSQL, MongoDB, Apache Spark, Pandas, NumPy, Power BI

Cloud & Tools: Git, GitHub, Docker, AWS, Azure, CI/CD, ML, LLMs, RAG, Agentic AI

EXPERIENCE

ElevanceSkills

Feb 2026 - Present

Data Analyst Intern

- Completed a 2-month internship (Feb–Apr 2026) followed by an ongoing second term (Jun 2026–Present) as a Data Analyst Intern, working on real-world data projects in a dynamic, project-based environment.
- Performed data cleaning, exploratory data analysis, and visualization tasks, transforming raw datasets into actionable insights to support informed business decision-making.
- Developed dashboards and analytical reports using tools such as Power BI and Python, enabling clear communication of data trends and performance metrics to stakeholders.

PROJECTS

Learn Sphere AI | Python, Flask, MySQL

May 2025

- Developed an AI-powered learning platform that recommends study materials and quizzes based on user performance and activity.
- Built secure Flask-based APIs with MySQL integration for user data, progress tracking, and content management.
- Implemented a lightweight ML model to generate personalized learning paths and performance insights.

ConceptAnim | TypeScript, React

Nov 2025

- Designed an AI-powered animation system to transform natural language descriptions into interactive educational visualizations and production-ready Manim Python code.
- Developed a real-time SVG animation engine with custom coordinate transformation, cubic easing interpolation, and multi-object state management supporting 10+ animation types (move, scale, rotate, fade, highlight).
- Integrated Google Gemini 2.5 Flash API with structured JSON schema validation to automate animation timeline.

Smart Service Connect | PHP

Nov 2025

- Developed a full-stack service-booking platform using PHP, MySQL and XAMPP, enabling users to discover local service providers and schedule at-home services through a streamlined web interface.
- Implemented secure user & provider authentication, service listings, booking management, and real-time status updates, improving overall usability and workflow efficiency.
- Designed and optimized the backend database structure for fast querying of services and providers, ensuring reliable performance and smooth interaction between customers and service professionals.

ACHIEVEMENTS / EXTRACURRICULAR

- **Infosys Springboard Internship 7.0 (May 2026)** — Shortlisted for a virtual internship after successfully clearing prerequisite courses and a video-proctored assessment on the Infosys Springboard platform out of a large applicant pool.
